DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Sills et al (US 6,690,746).

Regarding claim 1, Sills teaches a method of identifying a signal type for an unknown signal (see abstract) comprising the steps of: selecting the unknown signal of interest from a displayed spectral waveform for a specified range of frequencies (col. 2, lines 19-23 & col. 6, lines 44-52); processing spectral data representing the unknown signal of interest to ascertain characteristics of the signal of interest (col. 2, lines 22-31); and from the characteristics of the unknown signal determining an identification of the signal type (col. 2, lines 22-49).

Regarding claim 2, Sills teaches the determining step comprises the step of comparing the frequency of the unknown signal with a database of spectral assignments for a plurality of known signals to identify the signal type (col. 2, lines 37-43 & col. 5, lines 17-20).

Regarding claim 3, Sills teaches a processing step comprises the step of estimating from the data an occupied bandwidth for the unknown signal as one of the characteristics for input to the determining step (col. 5, lines 56-64 & col. 6, lines 51-60).

Allowable Subject Matter

Regarding claims 4-6; please see reasons for allowance in office action # 2, dated 10/3/02.

Response to Arguments

Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 6,104,922 User authentication in a communication system utilizing biometric information.

US 4,085,367 Method and detection of phase and frequency modulation.
